**PRINT & CUT
IN A SINGLE OPERATION**

IOC Inline Offset Cutting

IOC allows you to die-cut, perforate, cut or crease directly on your offset press. Our optimal performance is achieved by using chemically-etched, machined, flexible dies complete with mounting bars specific to your press. Now you can print, die-cut, and perforate in a single pass to the highest standard of quality. During follow up print runs, the die is ready for immediate use.

GO GREEN !!

We've been green for over 50 years!

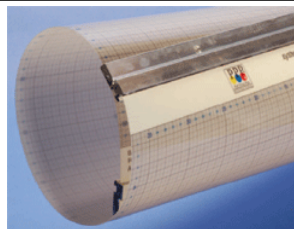

Go Green, Choose the Original Today!

Easily identified by their green box, Boyd's traditional Litho-Perf, Micro-Perf, Litho-Perf Center-Series, and Micro-Perf Center-Series products remain the industry standard for reliability and high quality performance.

These industry leaders allow you to keep jobs in-house with a quick turnaround by perforating on your press while you print. Save money, control quality, and maximize your potential with H.S. Boyd's offset converting products today.

When Only The Best Will Do

Precision-Rules® *NEW*

The Precision Rules® line of products are designed for critical kiss cutting/creasing applications. Precision Rules® work in conjunction with all on-press finishing systems and are available in two heights, 0.6mm (.024") and 0.9mm (.035"). Precision Rules® maintain a tolerance of ".0002" providing an exact cut or crease with minimum pressure every time.

Precision Rules® are designed and manufactured to the same standards as all H. S. Boyd products and are diamond sharpened and heat treated to insure maximum durability.
