

# The Layout Form

The New Layout Form (LF) is made from your job specific die line . The die line is converted and printed into the carrier material.

It is attached like a normal blanket. It comes with blanket bars, ready to install.

The Precision Perf/Score/Slit product is mounted using the guide lines on the LF.

Each time the job comes around, the LF is ready to go. Set up takes as long as changing a blanket.

#### List Prices:

40"	\$515
29"	\$375
20"	\$285
